TYMS

Reactivity:Human

Tested applications:WB IHC IF FC

Recommended Dilution:WB 1:500 - 1:2000 IHC 1:50 - 1:200 IF 1:20 - 1:50 FC 1:20 - 1:50 Calculated MW:36kDa Observed MW:Refer to Figures Immunogen: A synthetic peptide of human TYMS Storage Buffer: Store at 4. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3. Synonym: TS; TMS; HST422; SCIENTIFIC

Catalog #:A0017 Antibody Type: Polyclonal Antibody Species:Rabbit Gene ID:7298 Isotype:IgG Swiss Prot:P04818 Purity:Affinity purification

For research use only.

Background:

Thymidylate synthase catalyzes the methylation of deoxyuridylate to deoxythymidylate using 5,10-methylenetetrahydrofolate (methylene-THF) as a cofactor. This function maintains the dTMP (thymidine-5-prime monophosphate) pool critical for DNA replication and repair. The enzyme has been of interest as a target for cancer chemotherapeutic agents. It is considered to be the primary site of action for 5-fluorouracil, 5-fluoro-2-prime-deoxyuridine, and some folate analogs. Expression of this gene and that of a naturally occuring antisense transcript rTSalpha (GeneID:55556) vary inversely when cell-growth progresses from late-log to plateau phase.
