CTSL

Reactivity:Human Mouse Rat

Tested applications:WB IHC

 Recommended Dilution:WB 1:500 - 1:2000 IHC 1:50 - 1:200

 Calculated MW:38kDa

 Observed MW:Refer to figures

 Immunogen:

 Recombinant protein of human CTSL

 Storage Buffer:

 Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

 Synonym:

MEP; CATL; CTSL1;

Catalog #:A1718 Antibody Type: Polyclonal Antibody Species:Rabbit Gene ID:1514 Isotype:IgG Swiss Prot:P07711 Purity:Affinity purification

For research use only.

Background:

The protein encoded by this gene is a lysosomal cysteine proteinase that plays a major role in intracellular protein catabolism. Its substrates include collagen and elastin, as well as alpha-1 protease inhibitor, a major controlling element of neutrophil elastase activity. The encoded protein has been implicated in several pathologic processes, including myofibril necrosis in myopathies and in myocardial ischemia, and in the renal tubular response to proteinuria. This protein, which is a member of the peptidase C1 family, is a dimer composed of disulfide-linked heavy and light chains, both produced from a single protein precursor. Multiple alternatively spliced transcript variants have been found for this gene.
