

FHL2

Reactivity:Human

Tested applications:WB

Recommended Dilution:WB 1:500 - 1:2000

Calculated MW:32kDa

Observed MW:Refer to figures

Immunogen:

Recombinant protein of human FHL2

Storage Buffer:

Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Synonym:

DRAL; AAG11; FHL-2; SLIM3; SLIM-3;

Catalog #:A1907

Antibody Type:

Polyclonal Antibody

Species:Rabbit

Gene ID:2274

Isotype:IgG

Swiss Prot:Q14192

Purity:Affinity purification

For research use only.

Background:

This gene encodes a member of the four-and-a-half-LIM-only protein family. Family members contain two highly conserved, tandemly arranged, zinc finger domains with four highly conserved cysteines binding a zinc atom in each zinc finger. This protein is thought to have a role in the assembly of extracellular membranes. Also, this gene is down-regulated during transformation of normal myoblasts to rhabdomyosarcoma cells and the encoded protein may function as a link between presenilin-2 and an intracellular signaling pathway. Multiple alternatively spliced variants, encoding the same protein, have been identified.
