

## ATG4B

---

**Reactivity:**Human

**Tested applications:**WB

**Recommended Dilution:**WB 1:500 - 1:2000

**Calculated MW:**44kDa

**Observed MW:**Refer to figures

**Immunogen:**

Recombinant protein of human ATG4B

**Storage Buffer:**

Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

**Concentration:**

ch

**Synonym:**

APG4B; AUTL1;

**Catalog #:**A2837

**Antibody Type:**

Polyclonal Antibody

**Species:**Rabbit

**Gene ID:**23192

**Isotype:**IgG

**Swiss Prot:**Q9Y4P1

**Purity:**Affinity purification

For research use only.

**Background:**

Autophagy is the process by which endogenous proteins and damaged organelles are destroyed intracellularly. Autophagy is postulated to be essential for cell homeostasis and cell remodeling during differentiation, metamorphosis, non-apoptotic cell death, and aging. Reduced levels of autophagy have been described in some malignant tumors, and a role for autophagy in controlling the unregulated cell growth linked to cancer has been proposed. This gene encodes a member of the autophagin protein family. The encoded protein is also designated as a member of the C-54 family of cysteine proteases. Alternate transcriptional splice variants, encoding different isoforms, have been characterized.
