FMOD

Reactivity:Human Mouse Rat

## Tested applications:WB IHC

Recommended Dilution:WB1:500-1:2000 IHC1:50-1:200
Calculated MW:43kDa
Observed MW:Refer to Figures
Immunogen:
Recombinant protein of human FMOD

## Storage Buffer:

Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with $0.02 \%$ sodium azide, $50 \%$ glycerol, pH7.3.

## Synonym:

FM; SLRR2E;

## Background:

Fibromodulin belongs to the family of small interstitial proteoglycans. The encoded protein possesses a central region containing leucine-rich repeats with 4 keratan sulfate chains, flanked by terminal domains containing disulphide bonds. Owing to the interaction with type I and type II collagen fibrils and in vitro inhibition of fibrillogenesis, the encoded protein may play a role in the assembly of extracellular matrix. It may also regulate TGF-beta activities by sequestering TGF-beta into the extracellular matrix. Sequence variations in this gene may be associated with the pathogenesis of high myopia. Alternative splicing results in multiple transcript variants.

Catalog \#:A6375
Antibody Type:
Polyclonal Antibody
Species:Rabbit
Gene ID:2331
Isotype:IgG
Swiss Prot:Q06828
Purity:Affinity purification
