Phospho-PRKAA1/PRKAA2-T183/T172

Reactivity: Human Mouse Rat

Tested applications:IHC

Recommended Dilution:IHC 1:50 - 1:100 Calculated MW:63kDa Observed MW:Refer to Figures Immunogen: A phospho specific peptide corresponding to residues surrounding T183/T172 of human PRKAA1 Storage Buffer: Store at -20. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Concentration: bch Synonym:

AMPK; AMPKa1;

Background:

The protein encoded by this gene belongs to the ser/thr protein kinase family. It is the catalytic subunit of the 5'-prime-AMP-activated protein kinase (AMPK). AMPK is a cellular energy sensor conserved in all eukaryotic cells. The kinase activity of AMPK is activated by the stimuli that increase the cellular AMP/ATP ratio. AMPK regulates the activities of a number of key metabolic enzymes through phosphorylation. It protects cells from stresses that cause ATP depletion by switching off ATP-consuming biosynthetic pathways. Alternatively spliced transcript variants encoding distinct isoforms have been observed.
