# Alkaline Phosphatase Bovine

Description: The Alkaline Phosphatase is purified by affinity chromatography, which results in an enzyme of high specific activity and purity. Alkaline Phosphatase is Dimeric protein having a molecular weight of 140 kDa, one Zn++ ion is tightly bound to each subunit, and another less tightly bound is involved in the catalytic reaction. Mg++ stimulates the catalysis. The binding site for Mg++ is different to that of Zn++, but will be occupied by excess Zn++ followed by loss of enzyme activity.

Catalog #:ENPS-329

For research use only.

Synonyms: EC 3.1.3.1, IAP, AP.

Source: Calf Intestine.

Physical Appearance: Sterile Filtered clear colorless solution.

Purity:95% pure by Gel Filtration.

## Formulation:

50% glycerol, 5mM MgCl2, 0.1mM ZnCl2 and 5mM TRIS, pH 7.0.

## Stability:

AP should be stored at 4°C. Please Do-Not freeze.

#### Usage:

NeoBiolab's products are furnished for LABORATORY RESEARCH USE ONLY. The product may not be used as drugs, agricultural or pesticidal products, food additives or household chemicals.

## **Biological Activity:**

>1000 U/mg (pH 9.6, 25°C and 0.025M glycin, 10% glycerol as buffer.
