

OCT Human

Description: Octreotide Human Synthetic is a single, non-glycosylated, polypeptide chain containing 8 amino acids, having a molecular mass of 1019.26 Dalton and a molecular formula of C₄₉H₆₆N₁₀O₁₀S₂. Octreotide is purified by proprietary chromatographic techniques.

Catalog #: HOPS-272

Physical Appearance: Sterile Filtered White lyophilized (freeze-dried) powder.

For research use only.

Amino Acid Sequence: H-D-Phe-Cys-Phe-D-Trp-Lys-Thr-Cys-L-threoninol.

Purity: Greater than 98.0% as determined by RP-HPLC.

Formulation:

The Octreotide was lyophilized from a concentrated (1 mg/ml) solution with no additives.

Stability:

Lyophilized Octreotide although stable at room temperature for 3 weeks, should be stored desiccated below -18°C. Upon reconstitution Octreotide should be stored at 4°C between 2-7 days and for future use below -18°C. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw cycles.

Usage:

NeoBiolab's products are furnished for LABORATORY RESEARCH USE ONLY. The product may not be used as drugs, agricultural or pesticidal products, food additives or household chemicals.

Solubility:

It is recommended to reconstitute the lyophilized Octreotide in sterile 18M-cm H₂O not less than 100 µg/ml, which can then be further diluted to other aqueous solutions.

Introduction:

Octreotide acetate is a longer acting synthetic octapeptide analog of naturally occurring somatostatin. It inhibits the secretion of gastro-entero-pancreatic peptide hormones and the release of growth hormone.
