c-erbB-2 Human

Catalog #:PKPS-347

For research use only.

Description:c-erbB2 Human Recombinant encoding 537-636 amino acids expressed in E.coli.c-erbB2 is purified by proprietary chromatographic techniques.

Synonyms: Receptor tyrosine-protein kinase erbB-2, EC 2.7.10.1, p185erbB2, C-erbB-2, NEU proto-oncogene, Tyrosine kinase-type cell surface receptor HER2, MLN 19, CD340 antigen, NEU, NGL, HER2, TKR1, HER-2, c-erb B2, HER-2/neu.

Source: Escherichia Coli.

Physical Appearance: Sterile Filtered clear solution.

Formulation:
c-erbB2 at 100

Stability:
Store vial at -20°C to -80°C. When stored at the recommended temperature, this protein is stable for 12 months. Please avoid freeze-thaw cycles.

Usage:
NeoBiolab's products are furnished for LABORATORY RESEARCH USE ONLY. The product may not be used as drµgs, agricultural or pesticidal products, food additives or household chemicals.

Applications:
ELISA, Inhibition Assays, Western Blotting.

Introduction:
c-erbB-2 is a receptor tyrosine kinase of the c-erbB family. It is closely related instructure to the epidermal growth factor receptor. c-erbB-2 oncoprotein is detectable in a proportion of breast and other adenocarconomas, as well as transitional cell carcinomas. In the case of breast cancer, expression determined by immunohistochemistry has been shown to be associated with poor prognosis.
