

Melanoma Human

Description: Melanoma (gp100) Human Recombinant (aa 1-150) expressed in E.coli, gp100 is antibody reactive. The Melanoma (gp100) is fused to a GST tag and purified by proprietary chromatographic techniques.

Catalog #: PRPS-516

For research use only.

Synonyms: Glycoprotein 100, gp100, Melanoma (gp100).

Source: Escherichia Coli.

Physical Appearance: Sterile Filtered clear solution.

Formulation:

Melanoma (gp100) in 50mM Tris-Acetate, pH7.5, 1mM EDTA and 20% Glycerol.

Stability:

Store vial at -20°C to -80°C. When stored at the recommended temperature, this protein is stable for 12 months. Please prevent freeze-thaw cycles.

Usage:

NeoBiolab's products are furnished for LABORATORY RESEARCH USE ONLY. The product may not be used as drugs, agricultural or pesticidal products, food additives or household chemicals.

Introduction:

Glycoprotein 100 (gp100) is a melanoma-associated antigen which carries immunogenic epitopes that are able to induce a CTL response against tumor cells. Antibody to melanoma gp100 is widely used in pathology due to its specificity and sensitivity in identifying melanocytic tumors.
